WE BELIEVE INDIA IS THE NEXT GAMING POWERHOUSE

India Is Largest Contributor To Global Game Downloads

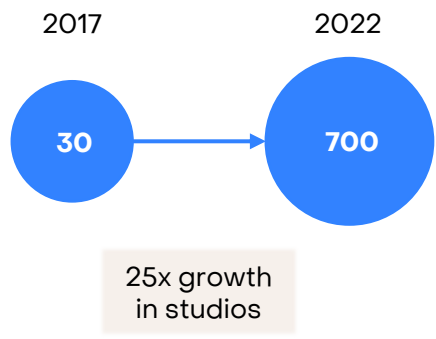

Depth Of Indian Dev. Talent Increasing Rapidly

Global studios are investing in Indian talent

Local studios in India are mushrooming

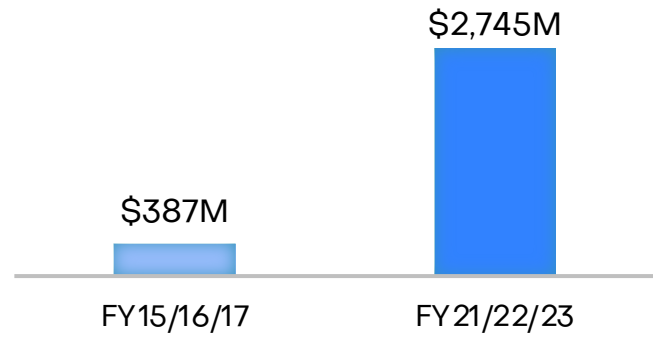

Large Outcomes Increasing Market Attractiveness

Multiple large domestic outcomes created

Gaming startups receiving considerable funding

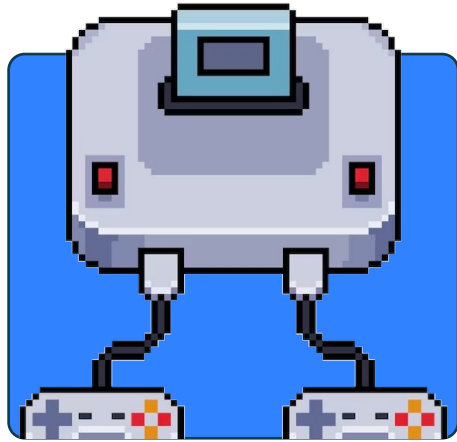

WE ARE EXCITED ABOUT FOUR FORWARD-LOOKING THEMES IN GAMING, BEYOND DIFFERENTIATED RMG PLAYS

Studio Plays

Studios with an ability to identify & create differentiated games in emerging, underserved genres for both Indian as well as global audiences

Game Dev Infra

Infra that can ease game development & leverage AI as a lever to save developers cost and time

Alt Distribution

Channels (e.g., virtual worlds, browser-first plays) that can emerge as alternate distribution platforms (beyond play store & app store) for games

Gamer Engagement

Tooling & social plays for the large & growing base of gamers and gaming creators

1. STUDIO PLAYS ACROSS GENRES

Building from India for the world

Strong talent depth	18,000 Number of game developers in India
Local testbed	~94% lower Avg UA costs in India v/s US for games

Domestic Outcome

Building in the word games genre; acquired by MTG for \$360M+	
---	--

We are excited by

Studios building in emerging / globally underserved genres

Focus on monetization depth and global replicability

Building from India for India

Robust ad-revenues	~\$100M Ad revenues for 6-8 homegrown content cos
IAPs driven by micro-trxns	\$13 (2x) Avg. non-RMG spend has gone up from ~\$6 in CY20

Examples

\$33M IAP spend b/w Jul'21-Jul'22		>\$15M IAP spend driven by Rs 10 micro-trxns	
-----------------------------------	---	--	---

We are excited by

Studios leveraging a differentiated mechanic / localized meta as a wedge

Focus on micro-transactions led IAP and an innovative GTM

2. GAMING INFRA - THE “PICKS AND SHOVELS” OPPORTUNITY

1. Pace of new game development has been rising

>75%

Publishers want to increase velocity of new game launch

2. Development costs for immersive games continue to be prohibitive for indie developers

\$100K - \$1M

Publishers want to increase velocity of new game launch

3. LiveOps and/or multiplayer are becoming staples across genres

66%

studios use timed events and daily missions as a retention hook

We are excited by

Using AI to solve for animation & contextual environment generation

 Blockade Labs

Monetisation plays – i.) Ad network orchestrators, in-game ad experiences ii.) Digital goods / NFT / Modding enablers

3. THE EMERGENCE OF ALTERNATE DISTRIBUTION PLATFORMS

1. Driven by in-built UGC tooling, virtual worlds like Roblox / Fortnite / Minecraft are emerging as sizeable distrib. platforms

>600M

Cumulative MAUs

>\$1B

Cumulative annual dev payouts

2. The web continues to be a lower CAC distrib. channel for existing studios and a lever for new platforms to emerge

350M+

MAU on instant FB games

Chrome to Web GPU

Catalyst for higher fidelity experiences on the web

We are excited by

Global & India examples

Entrenched teams building multi-game studios on top of virtual worlds

Virtual worlds leveraging right platform shifts having quality creator tooling & a strong wedge game

Browser-first distribution platform for games with a strong social layer

4. ENGAGEMENT PLAYS BUILDING FOR THE GAME “CONSUMER & “CREATOR”

- 1. Large appetite for gamers to consume ancillary content outside the core game & socialize with other gamers**

140M

Twitch MAU

19M

Active servers on discord

- 2. Gaming-focused creators & streamers continue to grow rapidly in both numbers & popularity**

2.5x
